CSC TRAVELS

Website Change Summary

Development update | 22 October 2026

Summary

This document records the website updates completed on 22 October 2026 across the homepage, taxi service page, assisted services page, and partner network page.

Services and service cards

- Renamed the homepage offering to Assisted Services and updated its copy to describe travel support exclusively for senior citizens. The card now lists ?Trained Volunteers Available.?
- Restored the dedicated service page under /assisted-services and replaced wheelchair-specific copy, icons, and form choices with volunteer support language.
- Rearranged the five homepage service cards into a responsive 3:2 desktop layout.
- Renamed the taxi card to Outstation Taxi Service and kept it linked to the existing taxi page.
- Removed the displayed fixed INR 12/km rate from the taxi page and homepage card. Fare wording now says the team confirms the fare before booking; tolls and parking are billed clearly.

Homepage layout and contact section

- Removed the complete Our Fleet section, including its heading, supporting copy, and four vehicle cards.
- Moved the statistics banner (500+ clients, 15+ vehicles, 24/7 service, and 100% satisfaction) to sit immediately before the Get In Touch section.
- Removed the white spacer below the statistics banner. Changed the contact section to a light orange background with dark text and light contact information panels.
- Adjusted vertical spacing around the Get In Touch content to balance the space above and below.

Partner network

- Removed the featured Citizen Savings & Credit Cooperative Society card at the top of the Partners page. The partner cards below it remain.
- Added 32 pixels of top spacing above the Partner Network heading.

Version control

The initial service cleanup and four-card layout update were committed and pushed to origin/main as f72b995 (?Remove assistive services and align service cards?). Later updates listed in this report are present in the local working tree and have not been included in that commit.
